Subject: Revised Mandatory Guidelines FR DOCKET 04-7984.

I would like to comment on the proposed federal guidelines for mandatory drug testing. As a sufferer of parauresis, I would like to make it clear that the inability to produce a urine sample should never be considered a refusal to produce a sample. Like me, there are thousands of honest, hard working Americans who have difficulty producing a sample in the presence of others.

When requested by the donor, other proven, effective tests (hair, sweat, oral fluid) should be administered in lieu of a urine sample. This is the only way to make sure that the tests are equitable and fair for all persons.

Regards,
